THURSDAY INTERDISCIPLINARY COLLOQUIUM

Thursday 23/12/2021

16:15-17:45

Menahem Yeari, Bar Ilan University

Deficits of poor comprehenders during reading comprehension: Evidence from online studies

Poor comprehenders are readers who have significant difficulties in reading comprehension despite intact reading (word-decoding) skills and normal (non-verbal) intelligence. To explore the cognitive deficits underlying their poor comprehension *during* reading, we employ various online empirical tools, including probing, eye-tracking, think-aloud, and computational simulations. In my talk, I will present findings from several studies that used these methods to examine inference generation and processing of main ideas during reading by poor comprehenders.
